

## ■ GY-6 Pin-index valves

- **Easy Operation**  
Because of the Cylindrical handle design, making a York connection is simple.
- **Color direction**  
Color indication on our handle enables the user to easily see at a glance whether the valve is opened or closed and therefore can reduce panicking in an emergency situation.
- **Smooth flow**  
This reduces the risk of Oxygen ignition.
- **Low torque operation**  
This enables weak patients and nurses, very Easy operation of the valve.
- **This Pin-index valve is also available with Our Uni-valve (RPV) system. The model is the GY-6U**

## ■ GY-3 type Pin-index valve (Wrench type)

- **Traditional Wrench type operation**
- **Smooth flow**
- **Low torque**
- **Also available with Uni-valve GY-3U model**
